Payment

Online and in-store payment methods info, maximum purchase amounts, installments and timing of payment options, setting or modification of saved payment methods, troubleshooting payment problems, unauthorized purchases, fraud prevention recommendations, and payment security measures. Mango.com offers a variety of payment methods for both online and in-store purchases, ensuring convenience and flexibility for customers.

Online Payments: Usually for online purchases debit or credit cards (Mastercard, Visa Electron, Visa, and American Express), PayPal, Click to Pay, Apple Pay (available only through the iOS app), and Mango Gift Cards. Some countries have their standalone payment methods, adapting us to customer nuances in those markets, for example: Multibanco in Portugal, those payment methods normally have their specific conditions, which can be checked within the KB or Help section in Mango/Outlet website.

Payment methods management: How to add, delete, modify. During checkout this option is available, can be opted to "Save these details for future purchases."

After placing the order: no pre-authorizations are performed on our side, once placed the order cannot be modified the payment method.

In-Store Payments: In physical Mango stores, payments can be made using cash, debit or credit cards (Mastercard, Visa Electron, Visa, and American Express), Mango Gift Cards and Google Pay or Apple Pay.

Country nuances: Specific payment methods from one country might exist for both Online and In-Store. Example: Multibanco in Portugal; iDeal in the Netherlands.

Payment Restrictions: Certain payment methods are not accepted, including bank transfers, cheques, cash on delivery, cryptocurrencies, and escrow. Additionally, purchases online cannot exceed for example in Spain €1,600 or contain more than 40 items. Usage of Gift card cannot be combined with certain payment methods. Also, Gift Cards cannot be combined with promo codes, as the field to apply both is the same.

Installment Payment Options: For example, Klarna, Scalapay, Klarna and Scalapay allow installment payments for orders over €70 in Spain, providing an interest-free option to split the cost into manageable payments.

Security Measures: Mango prioritizes payment security by using PCI DSS verified systems and SSL encryption to protect confidential payment information. Customers are advised to ensure they access the website through secure connections and avoid unofficial links.

Recommendations and Issues: For an optimal payment experience, customers should ensure their app or browser is up-to-date and double-check their payment details. If there are any issues such as duplicate charges, missing orders, or suspected fraudulent transactions, it is advisable to contact the bank for assistance.
